

[Home](#) / [Sectors](#) / [Automotive industry](#)

In the automobile production of today as well as in its supplier industry, flexibility is crucial as regards competition and ensures long-term success. Robots equipped with tool-changing systems produce various series of vehicles on one and the same production line. With our articles developed especially for this field, we contributed considerably to the increase in productivity and the improvement of our economy.

Our products are used in body manufacture, exhaust gas technology, in temperature regulating systems and, last but not least, as feed lines and supply lines.

Profit from our strengths and our many years of experience. We will support you with a tailor-made solution adapted to your technical and economic requirements.

Selection of our delivery range:

- [Rubber hoses](#)
- [Hose fittings](#)
