

[Home](#) / [Custom-made products](#) / [Rubber hoses and -elbows](#)

Constructional and spatial circumstances often force us to find exceptional solutions.

Hose lines are manufactured based on customer requirements or legislative specifications.

Merging both components, hose and fitting, into a functional complete line adapted to its application is one of our strengths.

Hose elbows with and without textile inlays are primarily used in cooling and lubrication systems in the construction of plants, motors, vehicles and special machines. Our products are adapted in form and shape to their specific requirements profiles.
