

[Home](#) / [Service](#)

While you concentrate on your core business, we will assume all activities for you regarding storage, commissioning and the dispatch of your products.

Optimum delivery is a pre-requisite for the efficient use of production capacities.

That is why our logistics solutions are flexible and straightforward as well as tailored individually for customers.

We optimise your supply chains by offering you the option of setting up a consignment warehouse with the advantages of a lower capital commitment, fewer processing expenses and maximum security of supply. This ensures the delivery is dispatched with barcode and according to your needs at the time agreed upon.

In order to decrease your acquirement of C-Parts and the enormous administrative and costly expenditures associated with it, we offer you effective C-Part management. Using rationalised order processes, sophisticated logistics and optimised inventory management, we lower your processing expenses.

We will be happy to advise you and present you with a C-Parts concept!

By taking over your specified suppliers and supporting them, we allow considerable process expense optimisation for you as well as a bundling of your requirements.

Using strategic purchasing controlling, we raise our supply quality thereby minimising your procurement risks.
